COFFEE GREEN BEAN

Our Core-Value

“We build sustainable coffee supply chains and accelerate the industry forward through technology, finance and logistics”

About Us

ESTABLISHED in 1999, we are a coffee company that has grown into a global specialty coffee supplier and consumers good company with 23 years of experience in the coffee industry. FnB Tech Indonesia coffee business, has a coffee plantation of 2,621 hectares in Dairi, Pakpak Bharat, which is the largest coffee plantation in Indonesia. We have exported to 33 major destination countries such as the United States, Europe, Asia, the Middle East, Australia and many other countries. This journey has made us one of the largest coffee exporters in Indonesia. To develop our business and build a network of work connections, we developed our

business by opening a coffee plantation and Arabica coffee cultivation, which was named FnB Tech Indonesia. FnB Tech Plantation's new business approach has been developed based on partnerships with selected local farmers who are also our assisted farmers. We incorporate new plantations into our operations to offer a consistent supply of our standard speciality coffee throughout the year, according to the specific demands of our clients. All coffee follows our strict quality control system, with farm-origin coffee beans that can be traced, processed, blended and cupped, conforming to one of our speciality coffee standards.

Landscape Coffee Plantation

Land Potential: 2.621 Ha

"FnB Tech Indonesia planted since 2010, by a joint venture between Indonesia and Japan (Tunggal Menara Jaya). Currently, it has become the first largest private coffee plantation in Indonesia."

FnB Tech Indonesia coffee plantation is a lush mountainous area with an altitude of 1200–1300 m asl. Fertile areas and the cold is caused by the eruption of Mount Merapi which formed Lake Toba. Volcanic soil is very fertile because it contains nutrients that are high when a volcano erupts. Estimated that the Lake Toba explosion occurred a few thousand years ago and an eruption Supervolcano the most recent. Bill Rose and Craig Chesner from Michigan Technological University estimate that

volcanic materials spewed out of the mountain as much as 2.800 km³, with 800km³ of rock Ignimbrite and 2.000km³ of volcanic ash which is expected in the wind has spread to half of the earth, from China to South Africa. The explosion occurred for 1week and throw the dust up to 10 km above sea level. The result of the eruption made the area around Lake Tova to be so fertile, with high humus content. Ground surface elevation and the temperature ranges between 26.3°C–

22° C, is also very suitable for growing coffee plants. FnB Tech Indonesia coffee plantation is only about 172 km from Medan City, North Sumatra, which is located on the shores of Lake Toba. Contributed to the stunning natural progress of buffer Lake Toba areas including Pakpak Bharat. Currently, **it is the first largest private coffee plantation in Indonesia with a plantation area of 2,621 hectares.**

Land Potential

Indonesia Specialty Coffee Plantation is a lush mountainous area with an altitude of 1200-1700m asl. Fertile areas and the cold is caused by the eruption of Mount Merapi which formed Lake Toba. Volcanic soil is very fertile because it contains nutrients that high when a volcano erupts. Estimated that Lake Toba

explosion occurred a few thousand years ago and an eruption supervolcano the most recent. Bill Rose and Craig Chesner from Michigan Technological University estimate that volcano material spewed out of mountain as much as 2.800 km³ of roch Ignimbrite and 2.000 km³ of volcanic ash which is expected in the wind has

spread to half of the earth, from China to South Africa. Explosion occurred during 1week and throw the dust up to 10 km above sea level. The result of the eruption made the area around Lake Toba to be so fertile, with a high humus content. Ground surface elevation and the temperature ranges between 26.3°C - 22°C is also

very suitable for growing coffee plants. Indonesia Specialty Coffee Plantation is only about 172 km from Medan City, North Sumatera, which is located on the shores of Lake Toba. Contributed to the stunning natural progress of buffer Lake Toba areas including Pakpak Bharat.

SUMATRA SUPER PEABERRY

A Peaberry is a single coffee bean within a single coffee cherry (fruit), instead of the usual two half-beans per cherry. In fact, only about 5-7% of any given coffee crop is Peaberry. Coffee beans are usually sold separately from other beans and Peaberry beans are generally valued higher than regular coffee beans because they are said to have a more concentrated flavor. Enjoy the taste of our Sumatra Super Peaberry, also known as the oval-shaped coffee bean. Carefully handpicked, these limited stock beans (only 5% out of all harvested coffee beans, screen size is 15mm up) have outstanding taste, making them very rare and special. Peaberry beans are only reserved for coffee lovers who appreciate high quality Indonesian Arabica beans.

Characteristics

Fragrance/Aroma: Fresh Nutty

Flavor: Complex Coffee Flavor with Hints of Vanilla

Acidity: Good Acidity

Body: Medium to High of Full-body (Rich)

SPECIALTY COFFEE The Prices Below are Indications, Subject to Confirmation

SUMATRA PEABERRY COFFEE

A Peaberry coffee is a single coffee bean within a single coffee cherry (fruit), instead of the usual two half-beans per cherry. In fact, only about 5-7% of any given coffee crop is Peaberry. Coffee beans are usually sold separately from other beans and Peaberry beans are generally valued higher than regular coffee beans because they are said to have a more concentrated flavor. Enjoy the taste of our Sumatra Super Peaberry, also known as the oval-shaped coffee bean. Carefully handpicked, these limited stock beans (only 5% out of all harvested coffee beans, screen size is 15mm up) have outstanding taste, making them very rare and special. Peaberry beans are only reserved for coffee lovers who appreciate high quality Indonesian Arabica beans.

Characteristics

Fragrance/Aroma : Fresh Nutty

Flavor : Complex Coffee Flavor with Hints of Vanilla

Acidity : Good Acidity

Body : Medium to High of Full-body (Rich)

Specification

Screen Size : 13-19 (4 > mm hole)

Moisture : Max 13%
